QuickPainter Pad Edge Painter

Model:
C800771.M

The tedious chore of cutting-in can be one of the most time-consuming and least favorite parts of painting a room. The HomeRight QuickPainter quickly and cleanly paints edges around baseboards, window trim, doors and ceilings. The built-in edging guide and convex design of the applicator pad enable precision application of paint along an edge.

HOW IT WORKS

Simply dip the tip of the QuickPainter into a can of paint. Draw back the plunger, sucking up to 4.5 ounces of paint into the handle. Then reattach the pad assembly and gently press the trigger. Paint will begin to saturate the durable neoprene pad, ready to apply to the wall. Once the flocking is primed and you're painting, a periodic press of the thumb resupplies the pad as you continue to cut in ? up to 50 lineal feet on one fill! The secret is in the thousands of special flocked bristles that trap paint onto the pad, allowing you to keep cutting-in longer with less time going back and forth to refill. Take the pain out of cutting-in with QuickPainter by HomeRight. And to make your entire project go even faster and easier, check out the HomeRight [PaintStick](#) [3] or [PaintStick EZ-Twist](#) [4]. Working on the same technology of loading paint into the handle, PaintStick allows you to paint an 8' x 8' area in as fast as 1 minute!

The [corner attachment](#) [5] and [replacement pads](#) [6] are also available.

MSRP:
\$14.99
